

High-speed metal cutting saw blades

Carbide or cermet tipped saw blades are suitable for high speed stationary semi-automatic and full automatic cutting units!

Fast cutting, burr free and without coolant of pipes and profiles made of:

Steel, stainless steel, plastics, compound materials, aluminium and other non-ferrous metals

- Shortest cycle times due to high cutting speed
- Material saving through thin cut technology with wall thickness starting from 0,5 mm
- Very high durability
- Excellent cutting quality
- Up to 5 times resharpenable

DRYTECH[®]

Specifications

Saw blade diameter	125 - 700 [mm]
Cutting capacity	Ø 6 - 240 [mm]
Cutting speed	max. 1.800 [m/min]
Blade feed	max. 6.000 [mm/min]
Cutting width (kerf)	2,0 - 3,6 [mm]
Center hole	Customer specific
Pin holes	Customer specific

*Special sizes on request
